Jewelry	Jewelry & Accessories	\$ 80	This exquisite set of earrings and necklace was handmade by an artist native to Colorado, Richard Pena. The pieces are created from glass, sterling silver and jasper beads. Jasper is an opaque and fine grained variety of Chalcedony. It is found in all colors including: red, brown, pink, yellow, green, grey/white and shades of blue and purple. It often contains organic material and mineral oxides which give it interesting patterns, bands and colors. Many of these patterns resemble landscapes with mountains and valleys, thus the name "picture" is part of the name of many well know jaspers. Jasper was a favorite gem in ancient times and is referenced in Greek, Hebrew, Assyrian and Latin literature. Picture jasper is a petrified or silicified mud that dripped into gas pockets in molten lava. It became superheated and then solidified forming the unusual banded patterns which are typical of this stone.
